- 256 shades of a single color, red or amber

## Full-Color Video Displays

- Graphic and video animations
- Trillions of colors

## Going "GREEN" with LED; ECO-EFFICIENT

LEDs are energy-more efficient than any other type of lighting as LEDs convert energy to light. They are safe, mercury-free and lead-free illumination using very little voltage. They are long-lasting (up to 10 times longer than traditional lighting for signage). LED signage helps to reduce paper costs by reducing the number of mailings, print bulletings and banner costs thereby saving our forests, as well.

## We Oversee Your Job from Start to Finish and Beyond

Visual Information Services Corp. along with their long term relationships will provide the total ONE SOURCE solution, including LED, structure, installation, software integration, secure wireless connections, on-site training and comprehensive warranty.

## Proven Reputation

*"We actually had an LED sign from one of our scoreboard vendors. We were so afraid to purchase from another LED company. After 4 years, we have 3 installs. Never a problem, they are always there when we need them... WE DEFINITELY chose the right company"*

**Jim Brown**

Director of Facilities & Operations, Hyde Park NY

*"Our LED sign is amazing! The graphics are first rate, the color is brilliant and the technical support is ready, willing, and very capable of walking any user, novice or expert, through the programming!"*

**Glen A. Zakian**

Principal, Farmingdale High School

*"I think our LED sign is terrific and the software is very user friendly. Having VISCO's support as back-up was so helpful. They made learning the sign very easy. Any questions I had were instantly responded to by one of their staff. I asked for a few special graphics for our art dept. VISCO provided them to us at no charge."*

**Lucille Romano**, Assistant Director, Herricks High School & Community Center
