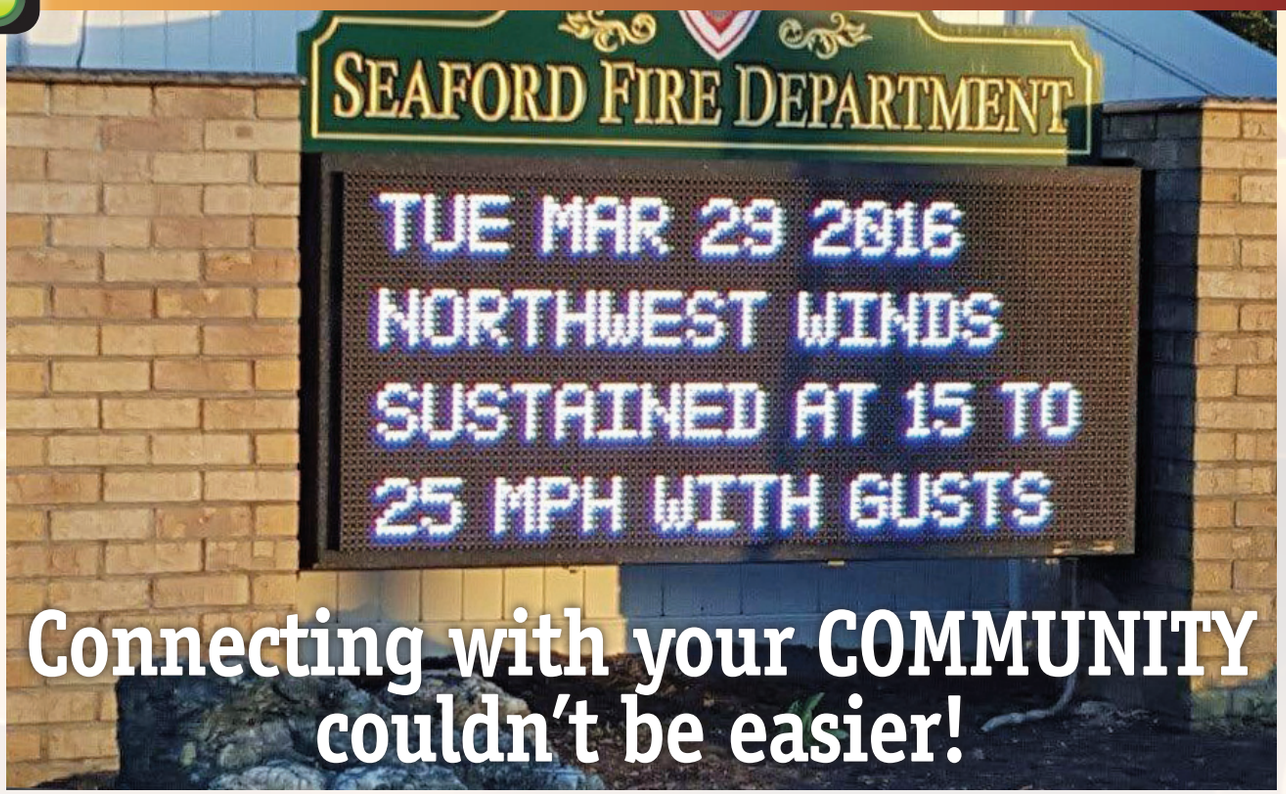
Fire District Signage



Connecting with your COMMUNITY couldn't be easier!

Our LED signage solutions are the most convenient way to get your messages out. High impact LEDs draw far more attention than your old manual letter board. The quickest way to promote an event or a fundraiser, LED signs are PROVEN to increase participation & awareness & will stimulate involvement. Displaying public safety messages convey your first and foremost concern; your community's safety. Displaying your district's performance each month, displaying budget or board meeting calendars or publicizing your website will do the job of keeping your community informed at all times.

Go "GREEN" with ECO-EFFICIENT LEDs

LEDs are more energy efficient than any other type of lighting as LEDs convert energy to light. They are safe, mercury-free and lead-free illumination using very little voltage. They are long-lasting (up to 10 times longer than traditional lighting for signage). LED signage helps to reduce paper costs by reducing the number of mailings, print bulletins and banner costs, thereby saving our forests as well.

Proven Reputation

"We have worked for years with Visual Information Services. Our new full color video display at the train station is fantastic. Their large professional video and graphic library help supplement the easy-to-use cloud software message creations we display on the sign. They are always there at any time to help. If we have an issue, they are right on top of it."

John Fabian
District Manager, Bellmore Fire District

"We love our full color sign. The graphics are awesome. I love that we get monthly-included professional graphics and animations that I can request right through the cloud software. On a late Saturday afternoon, I was away from my laptop and a board member was turning 94. I emailed Visual Information and they had it up on the sign that evening.

Thank you again! They are awesome people."

Chuck Bissinger
Coldenham Fire and Rescue
